M0273 - Rev. 09/18

"I love the GolfGreens™ True Putt 10/11 because it's fast like the pro greens I'm used to. It's a nice consistent surface to practice putting on. Plus, the Fringe and DuPont™ ForeverLawn® Select HD top off the whole look."

Jimmy Hanlin
PGA Professional

Giving you the green that suits your game.

Whether you are looking for a practice green to improve your game, or a recreation area for entertaining, GolfGreens™ by ForeverLawn® has a premium putting green to meet your needs. Both avid and leisure golfers alike will enjoy the beautiful appearance and realistic play of our superior putting greens. Enhance any environment, from backyards and basements to golf courses and resorts.

Where will you put your green?

.....

True Putt 10/11 - This is a texturized nylon green with a low pile height and fast play. Stimp speed starts between 10 and 11. Installation adjustments can be made to increase stimp speed up to 13. Minimal use of sand (1 pound psf). Rubberized backing provides for smooth roll and great performance. Great for putting—simulates fast greens.

EZ Putt - This is a texturized nylon green with a medium pile height. Stimp speed is between 9 and 10 (2 pounds of sand psf). Good for putting and catching short range approach shots.

Pro Putt & Chip - This is a texturized nylon green with a tall pile height. Stimp speed is between 8 and 9 (4 pounds of sand psf). Good for putting and catching medium range approach shots.

Pin Seeker - This is a polypropylene sand filled green. Stimp speed can vary based on amount of sand used (typically 6-8 pounds psf). Good for putting and longer approach shots.

ProDrive - Great for Tee Line and driving range applications. A tall, thick, dense, all nylon product that can hold a tee and will not melt under club friction.

Fringe - This product provides an attractive apron around the putting green. This great-looking, high-performing, antimicrobial product is quickly becoming a favorite fringe turf to complement any of the GolfGreens™ products.
